- WCF REST API
- SQL Server store procedures development and maintenance

.NET Developer

Accendo S.A, Argentina / October 2014 - July 2015

C# | ASP.NET | Dynamics AX

- Dynamics AX form development leveraging X++/C# and the Axapta SDK

Personal and Freelance Projects

Angular/Karma Test Explorer Extension for VSCode

Visual Studio Marketplace

Visual Studio Code extension built with TypeScript that allows you to run or debug your Angular or Karma tests directly on Visual Studio Code

Serverless eCommerce Website - Maruja Accessories

eCommerce built with Next.js, TypeScript, Sanity.io as a CMS and a custom integration to Mercado Pago as a payment solution. My role as a tech lead in this project involved analyzing requirements, designing the architecture, choosing the stack and mentoring a junior developer.

Personal Website and Blog

Personal website and blog where I write about functional programming and software architecture targeting the Spanish speaking community. Built with Gatsby, React, Styled Components, GraphQL and hosted on Netlify.

Android/iOS Application - Expenses Reimbursement

Cross-platform mobile app development using Xamarin.Forms, C# and MVVM with Microsoft SharePoint 2013 as a backend server.

Bots and Trainers for Various Online Games

C++ (MS Detours) and C# (EasyHook) DLL using API hooking during runtime. The DLL communicates with a WPF Client using interprocess communications.

Education

Information Systems Engineering

2013-2017 | Incomplete | Universidad Tecnológica Nacional

.NET Development Bootcamp

July 2014 - October 2014 | Accenture

Bachelor of Business Administration

2008-2013 | Incomplete | Universidad de Buenos Aires

Languages

Spanish - Native

English - Professional Working Proficiency

Certifications

Xamarin Diploma

October 2016 - Intermediate Level - Microsoft Latin America

Microsoft Dynamics AX 2012 | MB6-869 Development Introduction

Microsoft Dynamics AX 2012 | MB6-701 Retail

May - July 2015 - EXO Training Center

Frontend Frameworks: Angular.JS

December 2016 - Coursera

Volunteer Work

Mentor at FrontEndCafé

Aug 2020 – Present

I mentor junior and medior level developers in topics like career advise, C# and object-oriented programming, clean code, design patterns and software architecture.

Other Technologies

Node.js, React.js, Git, SQL, HTML5, Sass, TypeScript, Xamarin, Functional Programming.
